

Press Release

2000Charge Merchants Rake In More Dollars

PASADENA, CA -- (BUSINESS WIRE) – November 1, 2007 -- **2000Charge, Inc.**, the award winning leading provider of alternative Internet payment solutions, has made US-based merchants that use their European payment solutions more US dollars. The all-time high rate of the Euro versus the US dollar has given merchants that use 2000charge's European debit and DirectPay solutions a fair advantage, as they bill their European clients in Euros and as such these merchants receive more dollars for each euro than ever before.

For those merchants that enjoy a currency advantage, 2000Charge will furthermore provide their non-European merchants the option to receive their funds in Euros. Merchants that not use European billing solutions should give these options some serious consideration, as there is no indication that the advantage that 2000Charge merchants experience will let up anytime soon.

About 2000Charge

Headquartered in the USA with offices in Europe and Asia, 2000Charge (www.2000Charge.com) is a well-established payments processor that offers merchants a complete set of payment solutions tailored to local markets around the world. The Company's focus remains alternative global Internet payments and providing merchants with easy-to-integrate and hassle-free solutions.

2000Charge has a complete line of payment services that addresses the needs of merchants to accept consumer payments from four continents: North America, South America, Europe, and Asia. Local customer support is provided in each country in their native language as part of the service offering, as well as settlement in local currencies, including USD, EUR, CAD, GBP, JPY and KRW.

Merchants wanting to increase sales and reduce costs while enabling consumers to pay with trusted brands around the globe can greatly expand payment processing options with 2000Charge. Currently, 2000Charge local solutions are operable in 36 European countries, Japan, China, Mexico, Canada and the United States.
