

POLi

A WHOLE NEW WAY TO PAY ONLINE

POLi Payments offers users a whole new approach to safe, secure, and easy online payments. Established in 2004, POLi has delivered an innovative and intelligent software platform for Australians and New Zealanders to transact safely and securely online.

With POLi, consumers use their debit funds to pay for online purchases rather than relying on a credit card. POLi payments are instantly debited from their bank account.

Merchants will instantly receive a receipt of the transaction, which means you can feel confident delivering goods and or services immediately.

POLi is perfect for those who don't have a credit card or prefer not to use it online.

There's no registration hurdle and customers can use it for free. POLi offers you a quick and simple way to increase your online sales and attract more confident buyers.

45% of Australian adults don't own a credit card, so POLi increases your sales by giving you the capability to accept payments online from these potential customers.

2000Charge provides the POLi payments method as part of their service offering to merchants worldwide, including customer support, integration and reporting.

Processing currency: **AUD, NZD**
Risk of chargeback: **NO**
Payment guarantee: **NO**

POLi offers a substantial improvement on existing online banking platforms with the added benefit of real time reconciliation errors.
POLi offers a smart new alternative to using credit cards online:

- Debit Payment Method
- No Customer Registration
- Real Time Notification
- Payment without a credit card
- Free to Consumers
- Simple and secure
